

This week in the lab you will work through the two projects at the end of Chapter 5 in pairs:

Nathaniel	Zoe	Mitchell	Edgar	Yohann	Aaron	Jacob
Becca	Shelby	Luis	Jake	Jordan	Christian G.	Grace
Joel	Jackson	Alan	Ben	Gretchen	Justin	
Robert	Garner	Connor	Min Ah	Kelly	Christian A.	

You will need to *bring your textbook* to lab.

Each student will submit their own lab write-up. This is not a formal lab report (with title, abstract, observations, and conclusions.) Simply write your responses to the problems in the book in complete sentences. I do expect your write-ups to be neat and well-organized, so if your handwriting is difficult to read, please use a word processor or mathematical typesetting program to write up your responses.
