

Write a paragraph explaining what we discovered through either Part (2) or Part (3) of the activity and discussion of finding bases for subspaces associated to matrices. A good paragraph will:

1. state the conclusions we came to,
2. give examples to illustrate each conclusion,
3. and use principles of good expository writing.

A very good paragraph will also show some depth of inquiry, e.g. asking questions or making conjectures about possible generalizations.
